

Events on 6th Reception Hall Dance Floor Middle Plan #1

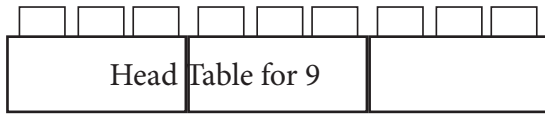

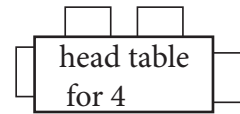

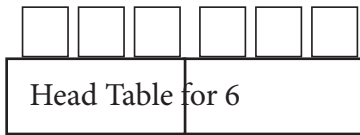

A typical layout for dance floor in the middle and head table along the long wall.
If the head table were longer, we can shift the tables around a bit.

This is 14 tables, which seat typically 8-10 people, so the total guest seating in this is 112-140 (plus head table)

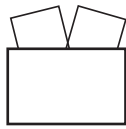

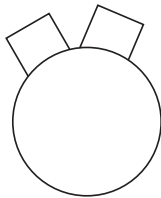

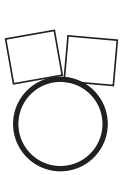

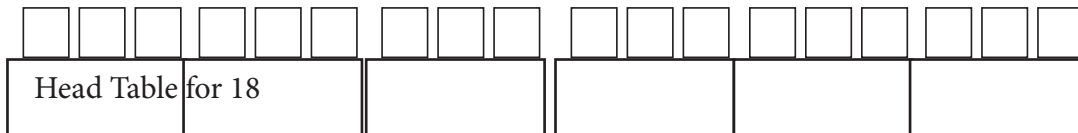

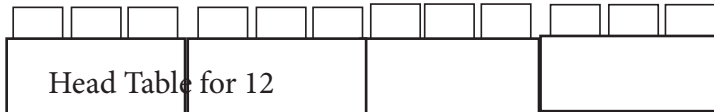

Total 120-148

Some Head Table Ideas

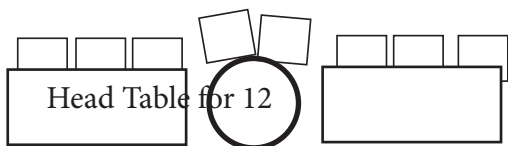

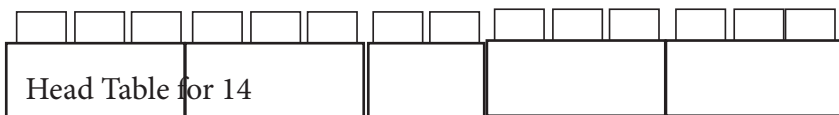

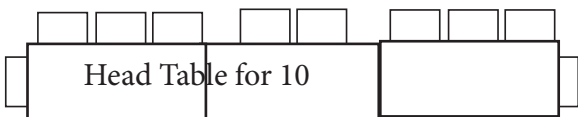

The 6' rectangular tables fit 3 people along one side, so one way to make your head table is to keep adding tables until you fit the number you need. You can also add two to the ends if you need two more people, but don't want to add another table.

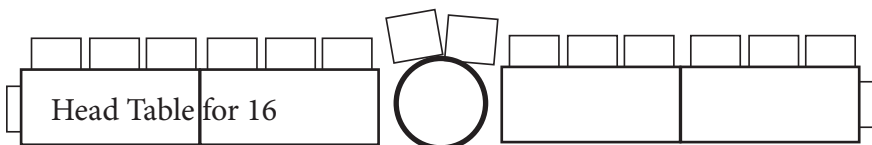

Sweetheart table

You can sit together at a cafe table, regular round table, 4' rectangular, or 6' rectangular

Switch things up and combine the sweetheart table with a head table

Or, of course, you could have no head table and you can sit at a regular round table with your guests!
